- 2、Android Application Development
- 3、The principle of computer composition
- 4、Operating system
- 5、Compiling principle

## Position

Android Application Development

## Experience

### Tentcoo Studio

Android Application Development | 2015.10 - 2017.11

#### Program Tentcoo Hi:

**This is an IM(instant messaging) application for the grade 2016 student.**

In this Project, I build it up with my another teammate. I was assigned to finish the IM part which including the Chatroom, Message List, Emoji Keyboard and the Notification. The Technology I had used are: access the **Easemob IM SDK**, use the **RecyclerView** for message list and chatroom list, use **Handler** to refresh the main UI thread and use the **Notification** to show the notification on the status bar.

#### Program TentcooTools.v2:

## **An multi-function contacts Application for our studio own.**

This program is the higher version of the **TentcooTools.v1** (which is built up by the grade 2014 student). It still is built up by me and my another teammate. I was assigned to build the main structure of the application, the weekly report module, the Vote module, the Self-Information module and the Contacts module. The technology I had used: **Dialog**, **PopupWindows**, **Self-Define View**, **Self-Define ProgressBar**, **Dynamically add View** to the Main UI thread, **ExpendableListView**, **SQLite Database**, **OkHttp**, use **Gson** to parse **Json** data and use the FaceBook Image cache framework – **Fresco**.

## **Program Zero-One:**

### **An Q&A Application that face to the grade 2017 student.**

I build this program up with my teammate. In this project, I was assigned to build the main structure of the application and Self-Information module. The main technology that I used: **Fragment**, **Viewpager**, **RefreshLayout**, **Gaussian Blur**, **Granted dynamically**, **take or select photos**.

---

## **Personal Works**

### **Fake WeChat**

2017.03

An application that imitated WeChat's UI and logic.

GitHub: <https://github.com/OuFungWah/FakeWeChat>
